

# KLARIKA CL

Mid early

The good fatty acids profile combined with the Clearfield® technology !

## ASSETS

High oleic

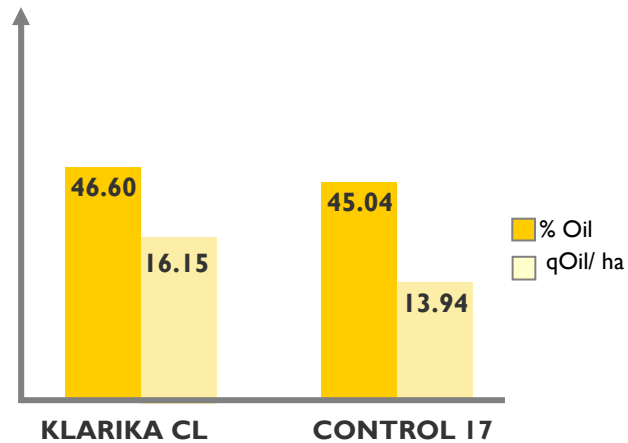

Good resistance to diseases

Very productive hybrid

### Sowing advice

Optimum density:  
from 65 to 72 000 seeds/ha

## Oil content and yield potential

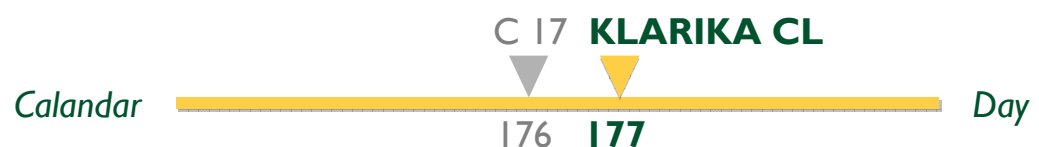

From R&D Departments- Caussade Semences

## Features

### Earliness

Flowering	Mid early
Maturity	Mid early
Size	Medium
<b>Resistance to diseases</b>	
Phomopsis	Very good resistance
Sclerotinia head	Quite good resistance
Downy Mildews Species resisted	100, 304, 703, 710, 770

## Flowering

From R&D Departments- Caussade Semences
