- *Poultry house bedding dispenser*
- *2 sizes - FS200/FS200 Xtra*
- *Efficient use of materials*
- *Even spread pattern 5-10 metres*
- *Labour saving with consistency uncompromised*
- *Independently-driven spinners - One or two-sided spread pattern*

# Poultry Dispenser

The AG FS200/FS200 Xtra Dispenser is specifically designed for bedding poultry/broiler houses.

It is labour-saving and gives a more even and economical use of bedding material. Growers report reduced downgrading due to less hock burn. Turnaround time between crops is significantly reduced.

The FS200 has a full spreading arc of 5-10 metres and works well with materials such as shavings, husks and other pre-chopped bedding materials.

Optional wear blade

Triple-sealed bearings

Adjustable plates to adjust the flow rate

3 positions for changing the spread pattern

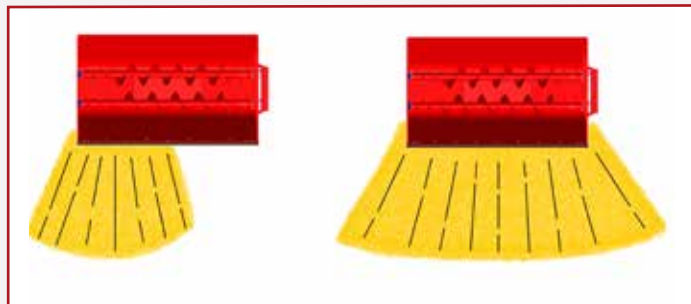

Spinners for more efficient bedding spread. Spreading tips can be removed to adjust spread from fine particles to large particles

Tractor-mounted

Loader-mounted

Half spread

Full spread

The FS200 Xtra has an easily accessible lever which can shut off one side of the machine, allowing a half-spread.

This ensures the bedding of poultry houses to be as efficient as possible.

	Capacity	Weight	Width	Depth	Height
FS200	2.20m <sup>3</sup>	665kg	2.14m	1.28m	1.24m
FS200 Xtra	3.30m <sup>3</sup>	720kg	2.21m	1.52m	1.64m
