WELCOME

JOURDAIN: A COMPANY WITH A WORLDWIDE REPUTATION

Our company's aim is to meet all of our clients' requirements, by offering high quality products and services to our network of dealers and to livestock producers.

Innovation and the renewal of our product range are essential for JOURDAIN'S development, both at national and international levels.

As a company, we constantly strive to improve ourselves at all levels throughout the conception, manufacture, commercialisation, and dispatch of our products, all with the help of the 195 members of our workforce who guarantee high-quality French manufacturing.

Our growing presence on the export front confirms our worldwide reputation.

JOURDAIN is renowned for its capacity for innovation and the quality and strength of its products. It is essential that we maintain these high standards.

SELF-SERVICE HORSE

SELF-SERVICE HORSE

HORSE SELF-SERVICE MODULE PLACE. The horse self-service module is mounted by clawed clamps on a metal frame made from tubes of Ø 60 mm. It can be used to group horses of the same size and feed them outside stabling. Mounting without a low wall, directly between posts. When mounting, consider creating a distribution of the self-service modules on the frame enabling blocking of areas which are dangerous to animals' feet, particularly by adding an extra bar.

M00180	Horse self-service place 1.8 m	18 kg
M00136	Horse self-service module frame 2 m	22 kg

OCTAGONAL POST

Ø 102 MM

CAUTION!
Pay attention to the post setting-in direction: the round section indicates the direction.

INSTALLATION ADVICE: Never set in an OCTAGONAL sleeve on its own. Always set it in with the post fitted, paying attention to the direction of the post and its brackets. The sleeve is marked 1D, 2D, 3D, 4D to show the correct direction for setting in. Fit the corrosion limiting sleeves before putting in the post.

OCTAGONAL POST TO BE SET IN Ø 102 MM x 4 MM

TR1850	Post OCTAGONAL bare L. 1.85 m (for HEADLOCK mounting) - Available in packs of 25	18.3 kg
TR2130	Post OCTAGONAL bare L. 2.13 m - Available in packs of 25	21 kg
TR2430	Post OCTAGONAL bare L. 2.43 m - Available in packs of 25	24 kg
TR2730	Post OCTAGONAL bare L. 2.73 m	27 kg
TR2131	Post OCTAGONAL 1 way Ø 102 mm (welded) - Available in packs of 25	22 kg
TR2132	Post OCTAGONAL 2 way Ø 102 mm (welded) - Available in packs of 25	23 kg
TR2133	Post OCTAGONAL 3 way Ø 102 mm (welded) - Available in packs of 25	24 kg
TR2134	Post OCTAGONAL 4 way Ø 102 mm (welded) - Available in packs of 25	25 kg
TR2135	Post OCTAGONAL 2 way L form Ø 102 mm (welded) - Available in packs of 25	23 kg

OCTAGONAL POST PLATE-MOUNTED Ø 102 MM x 4 MM

TR1680	Post OCTAGONAL bare on base Ø 102 mm L. 1.68 m + gussets 8 mm - Available in packs of 25	19 kg
TR2139	Post OCTAGONAL bare on base Ø 102 mm L. 2.13 m + gussets 8 mm	23 kg

OCTAGONAL BRACKET Ø 102 MM FOR OCTAGONAL POST

With reinforced side 60 x 8 mm

TR4001	Bracket OCTAGONAL 1 way Ø 102 mm	2.2 kg
TR4002	Bracket OCTAGONAL 2 way Ø 102 mm	2.7 kg
TR4003	Bracket OCTAGONAL 3 way Ø 102 mm	3.2 kg
TR4004	Bracket OCTAGONAL 4 way Ø 102 mm	3.6 kg
TR4005	Bracket OCTAGONAL 2 way L form Ø 102 mm	2.7 kg

SURLOCK® PATENTED

FE3153	ROUND bracket Ø 102 mm SURLOCK® single bolt support	2.5 kg
FE3156	ROUND Double SURLOCK® bracket Ø 102 mm	5.3 kg
FE3051	ROUND SURLOCK® face-to-face bracket Ø 102 mm	3.3 kg
FE3113	SURLOCK® wall bracket	pair 2.8 kg
FE3114	Double SURLOCK® fitting	pair 7.6 kg

ACCESSORY

The metal blocking device prevents the animals from unlocking the chain. The metal blocking device is installed on the OCTAGONAL or ROUND brackets and on single brackets. Not suitable for MULTIFIX brackets and double or triple brackets.

FE2095	Metal safety blocking device for chain - Available in packs of 40	0.004 kg
---------------	---	----------

OCTAGONAL SLEEVE FOR OCTAGONAL POST Ø 102 MM

In order to make a post demountable: order an OCTAGONAL sleeve Ref. TR4100.

To LIMIT corrosion order, a green post guard consisting of a sleeve and the holding flange Ref. TR1603.

TR4100	Demounting sleeve Ø 102 mm with collar seal and base - Available in packs of 34	0.5 kg
TR1613	Sleeve lid Ø 102 mm	1 kg
SV9341	Support bracket Ø 102 mm for OCTAGONAL sleeve	0.7 kg
TR1603	Complete green post guard for OCTAGONAL Ø 102 mm post	1.44 kg NEW

IMPORTANT! In order to reduce zinc destruction and steel corrosion due to prolonged contact with silage, slurry and manure, we recommend that you buy the powder coated post and use the octagonal double sleeve. Another option is to crimp the heat-shrinkable protection sleeve (TR0101). To protect the bottoms of barriers we recommend, before use, the application of an industrial paint composed of a bonding primer adapted to galvanized products before application of an epoxy paint, ensuring that the paint is suitable for animal use. It is to be applied on the following equipment: post bases, bottom of barriers and cubicles, knee bars, brackets etc.

ILLUSTRATION OF HOW TO USE DOUBLE SURLOCK® BRACKET/FITTING

SURLOCK®

THE SURLOCK® BRACKET COMBINED WITH AN AUTOLOCK GATE FRONT ENSURES THAT THE GATE WILL BE BOLTED WHEN IT IS SLAMMED SHUT. The SURLOCK® works for both left and right-hand opening thanks to the movable SURLOCK® catch. Our clients now find the SURLOCK® indispensable as a safety device. SURLOCK® is patented.

HOLDING

PANEL

LIGHT HOLDING BARRIER FOR HORSES, SIMPLE AND FAST CREATION OF MOBILE HOLDING PENS. Chain assembly facilitates maintenance of the panels thus ensuring their stability. The skids enable easy movement. Made from special oval tube, external tubes 50 x 25 mm, internal tubes 42 x 21 mm. Distance between tubes 21 cm. Height: 1.57 m. Dimensions for round pen: 16 panels of 2.4 m = Ø 12 m, 16 panels of 3 m = Ø 15 m and 16 panels of 3.6 m = Ø 18 m.

FOR ROAD TRANSPORT, ALWAYS COMPLY WITH THE HIGHWAY CODE.

PANEL

PA2400	Holding panel 2.4 m - With 1 vertical reinforcement - <i>Available in packs of 8 and 16</i>	30 kg
PA3000	Holding panel 3 m - With 1 vertical reinforcement - <i>Available in packs of 8 and 16</i>	35 kg
PA3600	Holding panel 3.6 m - With 2 vertical reinforcements - <i>Available in packs of 8 and 16</i>	41 kg

SMALL GATE

FOR PANEL

Width 1.2 m, height: 2.25 m. Adaptable for the 3 models of panels. Sold individually.

PA2200	Small gate adaptable to panel (N.B. 1 panel 2.4 m + 1 small gate = 3.6 m)	30 kg
PA2900	Adjustable panel arch	19 kg

TRANSPANEL

For storing and transporting panels. Capacity of 16 panels and 1 small gate. Transport by 3 point system or on forks. Delivered with a ratchet and strap.

PA0060	Transpanel only	157.5 kg

GALVANISATION STORAGE

VERY IMPORTANT

THE HOT GALVANISATION PROCEDURE AND STORAGE RECOMMENDATIONS

All of our products are hot galvanised in compliance with the ISO 1461 standard. Galvanisation provides a zinc-based surface covering that is aimed to protect steel from corrosion.

Thanks to their design, all of our products are totally protected both on the outside and the inside thanks to the hot dipping technique, where they are immersed in a liquid zinc bath maintained at 450°C.

The 1461 standard “Hot dip galvanised coatings on fabricated iron and steel articles” defines the properties, minimal thicknesses, and characteristics of the hot dip galvanisation coating, together with the trial methods for checking the thickness of the zinc per surface area unit, its aspect and adherence, as well as the criteria for conformity.

Depending on the design of the part, the chemical composition of the steel, its thickness, its surface aspect, and other technical parameters, the thicknesses of the zinc that has been deposited are variable but always within the indicated values defined in the 1461 standard.

Our galvanisation factory partner has ISO 9001 certification.

The zinc, when exposed to the atmosphere, reacts naturally with the ambient elements: moisture, oxygen, carbonic gases, and so on, and forms a film. This results in a reduction of the surface's metallic shininess, where the aspect is concerned.

The film produced is insoluble, with a high level of adherence, and provides added protection to the coating.

However, the structure of this film is altered when it is in contact with stagnant water, and white stains with a low level of adherence and no protective characteristics are quickly formed. The level of protection provided by the zinc is not altered.

Galvanised equipment must only be stored on tannin-free wood, and under no circumstances should it be left in contact with the ground. Air must be able to move freely around the different pieces, and stagnating water must be avoided.

Prolonged contact with slurry, farmyard manure, urine, silage, weed-killers, fertiliser, road protection products, pesticides, disinfectants or any other chemical product can, in certain cases, lead to rapid alteration of the zinc protective coating.

CAUTION! In order to reduce zinc destruction and steel corrosion due to prolonged contact with silage, slurry and manure, we recommend that you buy the powder coated post and use the octagonal double sleeve. Another option is to put on a heat-shrinkable protection sleeve (TR0101). To protect the bottoms of barriers we recommend, before use, the application of an industrial paint composed of a bonding primer adapted to galvanised products before application of an epoxy paint, ensuring that the paint is suitable for animal use. It is to be applied on the following equipment: post bases, bottom of barriers and cubicles, knee bars, brackets etc.

IMPORTANT INFORMATION

This Price list - Catalogue remains JOURDAIN's property.

The reproduction of our texts, notices, diagrams or photographs, even partially, is absolutely forbidden. The photographs shown in this catalogue are non-contractual.

JOURDAIN is continually trying to improve the efficiency of its equipment, and therefore reserves the right to modify, without prior warning, and without it being held against the company, the characteristics of the models shown in this brochure.

Although the conditions imposed on our suppliers and the detailed checks that are carried out at all levels of production enable us to give the accurate weights of our products, it is possible that there may be variations of +/-2% which may be largely due to the different quantities of zinc held inside tubes after each dipping.

When transporting products such as: hay racks, feeders, transpanels and so forth, it is absolutely imperative that the highway code is complied with. Under no circumstances can JOURDAIN SAS be held responsible in the event of an accident.

In order to benefit from optimum use of the products, it is essential to check that everything is correctly tightened and that any moving parts are lubricated regularly.

Despite all the attention to detail that we put into the design of our products with animal welfare and maximising safety as our top priorities, JOURDAIN cannot be held responsible for any accident involving an animal.

The knowledge and the daily surveillance of the livestock by the farmer remain the most reliable means of accident prevention.

CORROSION

OF GALVANISED STEEL AND PARASITIC ELECTRICAL CURRENTS

All JOURDAIN products are galvanised in compliance with the 1461 standard, in just the same way as all the other livestock equipment on the market.

However, depending on its environment, even galvanised steel can present a risk of corroding in the medium- to long-term, in spite of its surface treatment.

The evolution of the composition of livestock rations, veterinary products, maintenance products, chemical sprays or a combination of the aforementioned can be factors that are capable of altering the zinc protective coating.

This mix works in the same way as a battery: contact with oxygen and acted on by the electricity present in the installation (parasitic, static, telluric, etc.) can lead to the zinc's structure being modified and the protective film altered. Due to this, the phenomenon of corrosion can appear in a very short time.

The end result being that there are multiple causes of corrosion that are sometimes difficult to detect in order to provide an explanation of why we are seeing what we do on posts.

HOWEVER, IN ORDER TO PREVENT THIS PHENOMENON, WE STRONGLY ADVISE THE FOLLOWING:

Double sleeve
